DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 8-20-04 have been fully considered but they are not persuasive. Nakagiri et al. teaches that dendrite precipitation reaction of the lithium metal as the active material can be inhibited. Thus teaching that lithium hydroxide or lithium oxide film is formed.

Election/Restrictions

2. Claims 6-19, 21-24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

Claim Rejections - 35 USC § 102

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakagiri et al. (JP 11, 288706, machine translation).

Nakagiri et al. teaches on page 7, [0058]-[0059] of the translation that a lithium foil was coated with LiF and LiCl. Nakagiri et al. teaches on page 6, [0048], that the negative electrode charge collector uses expanded metal made from nickel. Nakagiri et al. teaches in the abstract that a dendrite precipitation reaction of the lithium metal as the active material can be inhibited.

Claim Rejections - 35 USC § 103

4. Claims 3, 20 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Nakagiri et al. (JP 11, 288706, machine translation).

Nakagiri et al. teaches on page 7, [0058]-[0059] of the translation that a lithium foil was coated with LiF and LiCl. Nakagiri et al. teaches on page 6, [0048], that the negative electrode charge collector uses expanded metal made from nickel.

In the event any differences can be shown for the product of the product by process claim 3, as opposed to the product taught by Nakagiri et al., such differences would have been obvious to one of ordinary skill in the art as a routine modification of the product in the absence of a showing of unexpected results. *In re Thrope* 227 USPQ 964; (Fed. Cir. 1985).

With respect to the product by process claim 3, the determination of patentability is based upon the product itself not upon the method of its production. *In re Thrope* 227 USPQ 964; *In re Brown* 173 USPQ 685; *In re Bridgeford* 149 USPQ 55; *In re Wertheim* 191 USPQ 90. Any difference imparted by the product by process limitations would have been obvious to one having ordinary skill in the art at the time the invention was made because where the Examiner has found a substantially similar product as in the applied prior art, the burden of proof is shifted to the Applicants to establish that their product is patentably distinct. *In re Brown* 173 USPQ 685 and *In re Fessmann* 180 USPQ 324.

Allowable Subject Matter

5. Claims 4-5 and 25 are allowed.
6. Claims 26-27 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
